

Service: Centralized Procurement and Cost Reduction

About Customer: Large Japanese company with 10+ manufacturing plants in India

Description:

Blue Ocean took the challenge of establishing and executing the sourcing activities from a central location. We analyzed the SAP data of all manufacturing plants of one year and formulated various strategies

Part Categories:

- Indirect products - Over 15+ product categories. Data with over 15,000+ line items and 200+ part numbers
- Consumables -

Achievements:

- Gave savings of 7-12% (Approx) across categories
- Cleaned the master data in SAP and rationalized over 75+ part numbers
- Supplier rationalization and identified new suppliers wherever required
